

## **Andrew Pyatt**

The Board of Trustees is fundamental to preserving the Loughborough Experience, all we stand for as a university and affects every student's day to day life. As inclusive and diverse as the union is I believe we can do more to equally represent the under represented groups such as LGBT, Mature and International students. By gaining a place as a trustee I believe I can be instrumental in promoting and ensuring the needs of these groups are met and exceeded along without losing focus on the majority population of this University.

I'm a versatile and adaptable character and I believe that I can contribute to all aspects of the board whether that be financial auditing or ensuring the Executive committee are operating efficiently. I have a keen eye for meticulous detail so I would ensure that no details, however small are overlooked as the smallest mistake in the constitution or a risk assessment can wreak havoc if not corrected.

As a fresher I may not have a long list of experience within the union but as the current LLGBTA Chair I believe I have already made notable improvements to my association as well as the experience offered to LGBT students, and I strongly believe I can bring innovation to the board if voted onto it.

I am passionate about promoting equality and diversity and ensuring an exceptional Loughborough Experience for all.

Many Thanks,

Andrew Pyatt

**Proposer: Joshua A. Ross**

**Secunder: James Louis Dale**

**Manifesto:**

As a Management Sciences student, I could contribute my knowledge in risk management and mathematical modeling to help the union make sensitive and informed decisions. Being an international student, I believe I could increase representation of international students and voice their problems/opinions.

I have become a Union Councillor and member of the Elections Committee because I am passionate in contributing and dedicated in enhancing student experience at Loughborough University. I wish to promote the transparency of the LSU and attract more passionate individuals like myself, who wish to make a difference, to become more involved with the union. It is then where we can keep improving the LSU and the experience it provides to students in the future.

Through my involvement with my previous school's student council, I had experience drafting a number of budgets and monitoring performance of delegates. I have also voiced my opinions to the school where appropriate and improved relationship between the school and the student body significantly. Thus, I have the confidence to work alongside other members of the board tirelessly, and strive to achieve a more democratic union.

If elected, except for ensuring that the union is financially healthy, I would also ensure that the union is acting in the best interest of all Loughborough students in a ethical and efficient manner. I also assure that I will undertake my responsibilities with integrity and be impartial in my judgements.
